

Bandit 320 Unit

A new compact and immensely versatile Fog Bandit product designed for smaller environments, both commercial and domestic, yet not compromising on the performance and reliability of the Fog Bandit 240 product portfolio.

Features

- Totally dust proof, maintenance free design
- Uses compact hermetically sealed, patented cartridges, these are room-size specific to deliver maximum protection without residue. Various sizes of fog cartridges are available and after use cartridges are easily replaced and empties are disposable as normal household/business waste.
- Bandit 320 systems are verified to fully comply with the EN50131-8 European Standard.
- Patented on-board electronics perform 24/7 system diagnostics.
- Can be oriented in any position (wall, ceiling, or floor).
- Various orientation options available.

Applications

The new Bandit 320 can be mounted in any orientation desired, whether wall, ceiling or low-level mounting. The 320 will operate effectively in any of these positions. When aesthetic considerations are important in a premises and the normal method of surface mounting the 320 on view may not be appropriate, a concealed variant can be provided for a hidden installation within a cabinet or behind an internal wall or above a suspended ceiling.
